

## **LITTLE GATE FARM FIRE SAFETY POLICY**

**Due to the nature of the learners and rangers on our farm, some of which may have learning disabilities and/or physical disabilities, it is particularly important that buildings and other areas can be evacuated quickly and easily in case of fire.**

***We at Little gate farm agree to provide:***

- **Adequate, signed fire exits in all buildings**
- **Disabled ramps where required on all exits**
- **Adequate fire alarm systems that are tested at the required intervals.**
- **Adequate (in date) fire extinguishers of the correct type, in all Buildings and fire blankets where required, and advised by an accredited fire safety consultant.**
- **Regular fire drills so that all students and staff are familiar with drill routine and assembly points.**
- **Risk assessments have been prepared for all tasks that have fire risk attached.**
